

**REMARKS/ARGUMENTS**

In response to Examiner Yao's telephonic request of November 7, 2005, and in accordance with 37 C.F.R. 1.821-1.825, Applicants request entry of the second substitute sequence listing enclosed herewith.

The original sequence listing filed June 15, 2004, and the substitute sequence listing filed September 15, 2004, inadvertently omitted a peptide sequence disclosed in the specification and claims of the application as filed. This matter has been rectified in the second substitute sequence listing enclosed herewith. The second substitute sequence listing, submitted in paper and computer readable (CRF) formats, properly presents each of the sequences disclosed in the application as filed.

The information contained in the second substitute sequence listing in CRF format was prepared through the use of the software program "PatentIn Version 3.1" and is identical to that of the paper copy of the second substitute sequence listing. As the sequence disclosure of the second substitute sequence listing does not go beyond that of the application as filed, the second substitute sequence listing contains no new matter.

In addition, the specification and claims have been amended to conform to the second substitute sequence listing by the addition of sequence identifiers (SEQ ID NOS). These amendments also do not constitute new matter.

In addition, claims 15-18 have been amended to identify the cells as "isolated". Support for amendments to claims 15-18 is provided throughout the specification, e.g., in paragraph [0028].

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 650-326-2400.

Respectfully submitted,

Anina D. Murphy
